Notice.

In order to make the Chemical Laboratory of the Department of Agriculture more immediately useful to the landholders and cultivators of Mysore, it has been decided to undertake analyses of manures and soils free of charge to all *bona fide* applicants. Together with the analysis, advice will be given as to the use of the manures as well as to their actual value. In the case of soils, suggestions as to suitable manures will be sent along with the analysis when so desired.

Those wishing to avail themselves of this offer should address the undersigned for instructions as to the taking and forwarding of samples for analysis. Each sample must be accompanied by an accurate description of its source.

As the staff of the Chemical Laboratory is, at present, small, only a certain amount of time can be allotted to this work. The analyses will be made for the most part in the order in which applications are received, but at the same time the aim will be to distribute the information to as many parts of the State as possible.
